Smart Marland Monitoring System

Up to the minute access to critical system operating conditions including Vibration, Temperature and Oil Level

NEW

You can now remotely monitor the condition of your equipment from anywhere using your computer or cell phone.

Performance capabilities:

- Monitor up to 6 devices from a single gateway
- Set desired report intervals
- Perform statistical analysis to identify maintenance and repair needs
- Alarm notifications

Simple system requirements:

- Power supply (24Vdc, 120/240 VAC, 50/60 Hz)
- Less than 200m line of site between gateway and devices
- Access to local network or cellular signal

Reporting capability:

- Current measurements
- Historic trending
- Vibration analysis
